Item Manager (Full Stack Template App): Business Requirements

1. Overview

Item Manager lets registered users keep a personal list of items. Administrators manage user accounts.

2. Roles

Role	Description
User	A registered person who manages their own items
Admin	A superuser who also manages all users

3. Requirements

3.1 Accounts

REQ-1: A visitor shall be able to sign up with a full name, an email address and a password.

REQ-2: Passwords shall be between 8 and 128 characters long.

REQ-3: A registered user shall be able to log in and shall stay logged in until they log out.

REQ-4: A user who forgot their password shall be able to request a password recovery email.

REQ-5: A user shall be able to change their own password by providing the current password.

REQ-6: A user shall be able to delete their own account; this removes all of their items.

3.2 Items

REQ-7: A user shall be able to create an item with a title and an optional description.

REQ-8: The item title is required and may be at most 255 characters long.

REQ-9: A user shall be able to edit and delete their own items.

REQ-10: A user shall see only their own items; an administrator shall see all items.

REQ-11: Users shall be able to share an item with another user by email.

3.3 Administration

REQ-12: An administrator shall be able to add, edit and delete users.

REQ-13: Only an administrator shall be able to open the Admin page.

4. Non-Functional

The application should be responsive and pleasant to use.
